Some Interesting Facts About Kidney Troubles

Few people realize to what extent

Few people realize to what extent health depends upon the condition of the kidneys.

The physician in nearly all cases of serious liness, makes a chemical analysis of the patient's urine. He knows that unless the kidneys are doing their work properly, the other organs cannot readily be brought back to health and strength.

When the kidneys are neglected or abused in any way, serious results are sure to follow. According to health statistica, Bright's disease which is really an advanced form of kidney trouble, caused nearly ten thousand deaths in 1912, in the state of New York alone. Therefore, it behooves us to pay more attention to the health of these most important argans.

Olmstead Gathers a Lot of AMERICAN DEATH HOUSE

This rule stone hovel tells a tragic story of ignorance and death in our own enlightened and lemmae land. It stands in the depths of the Mammoth Cave of Kentucky, and in it fied a dozen or more consumptives 50 years ago. Some one started the story that the cave would cure consumption. This structure was built and several hopeful victims went into the darkness and the dampness to die. The craze died with them. Such a theory seems utterly preposterops in these days when God's sunshine and nir are throttling tuberculosis every day, but only bitter results disproved it half a century ago.
